PROJECTS

External Sales Payment System(ESPS)

ESPS project is used for calculating the commissions which are being provided to Dish sales partners like retailers, distributors etc. for bringing the dish subscribers. It is also used for generating the reports of various payments which are made to respective partners and for business and audit team.

External Payment Provider (EPP)

EPP project is used for calculating the payments on every work order which is done by dish RSPs and SUBs on the basis of task types, which means which type of task any technician has completed.

Damage Claim System (DCS)

DCS project is used to pay for the damages customers claimed from DISH if some accidents /uneven happened while technicians visit the customer place for providing services.

Ontech Refund Tool (E-Refund)

Ontech Refund tool or E Refund project is used to calculate and issue the refund for the customers when customer cancel or return the ontech devices or services. When customer call to cancel ontech services, billing and credit team will find which and how much refunds need to be returned to customer.
